*1: Two wires connected to P1−b'. One runs to each analog switch card.
Prime Focus Camera
Electronics Box Wiring

Video signal coax cables have shields wired to center of SMA coax connector "Video Ground," and not to SMA connector cases. The coax shields connect the video ground to AGND via the SMB coax connectors on the preamplifier cards.

07–29–97: Modified to reflect actual wiring and new changes.
06–04–97: Changed parallel clock labels and added CCD pin labels
06–20–97: Added 4 SGND wires to CCD socket, swapped pins A and Y
06–26–97: Changed connector numbering
01–24–98: Unknown modifications made by K. Gilmore, probably to the effect of connecting SGND locations inside the electronics box.
